

RAHUL KASTURIYA (PRIMUEZ)

AI Systems Architect · Autonomous Agent Engineer · Full-Stack Flow Specialist

Raipur & Indore, India | +91 70246 37099 (WhatsApp only) | contact@primuez.in | primuez.in | github.com/Primuez | linkedin.com/in/rahul-kasturiya-796910363

PROFESSIONAL SUMMARY

Triple Oracle AI Certified Professional and **n8n Certified Professional** with extensive hands-on expertise architecting, building, and deploying production-grade **Autonomous AI Agents**, **Model Context Protocol (MCP)** integrations, and enterprise-scale **Workflow Automations**. Proven capability in engineering end-to-end full-stack systems from initial concept to live monetization—bypassing boilerplate tutorials by deploying real-world AI applications with integrated Supabase databases, RAG knowledge stores, and payment rails. Specialized in multi-model agentic orchestration (Hermes Agent, Antigravity, OpenClaw, NemoClaw), serverless edge infrastructure (Cloudflare Workers, Vercel), headless browser crawling (Crawl4AI), and continuous deployment across containerized Linux VPS environments with guaranteed 99.9% uptime.

TECHNICAL & CORE COMPETENCIES (ATS KEYWORD MATRIX)

Agentic AI & Orchestration:	Autonomous Agents (Hermes Agent, Antigravity, OpenClaw, NemoClaw), Model Context Protocol (FastMCP, Custom MCP Servers), Multi-Agent Action Queues, Retrieval-Augmented Generation (RAG), Tool & Function Calling, Prompt Engineering & Evaluation, Multi-Modal AI, Context Engineering, Crawl4AI
Workflow & Automation (RPA):	n8n (Official Certified Professional), Make.com (Integromat), Zapier, Robotic Process Automation (RPA), Composio Gateway, RESTful & GraphQL APIs, Webhooks, OAuth 2.0 / SSO, Event-Driven Architecture, Headless Browser Automations, AsyncIO Task Queues
Cloud & Infrastructure:	Cloudflare Workers & KV/D1/R2, Vercel Edge, Hostinger Linux VPS, Oracle Cloud Infrastructure (OCI ARM64 24GB VPS), Docker, Docker Compose, Traefik Reverse Proxy, Nginx, CI/CD Pipelines, Git / GitHub Actions, Linux System Administration, Bash Scripting
Full-Stack & Databases:	Python (FastAPI, AsyncIO, PyMuPDF, ReportLab), TypeScript / JavaScript (Node.js, Next.js, React), Tailwind CSS, Electron.js, WebGL, Supabase (PostgreSQL, Row-Level Security / RLS), SQLite, Razorpay API Monetization, JSON Schema Validation
Search & AI Optimization:	Generative Engine Optimization (GEO matrices), Answer Engine Optimization (AEO), Programmatic SEO, Structured Data (JSON-LD, Schema.org), Knowledge Graph Optimization, AI Crawler Manifests (/llms.txt), Semantic Search & Embeddings
Engineering Methodologies:	System Architecture, High-Availability Design (99.9% Uptime), Test-Driven Development (TDD), AI Solution Validation, Performance Optimization & Latency Reduction, Security Hardening, Agile Prototyping

PROFESSIONAL EXPERIENCE & DEPLOYMENTS

Founder & Lead AI Solutions Architect — Primuez AI Systems

July 2025 – Present | Indore & Raipur, India

- Architected and deployed **50+ production-grade autonomous workflow pipelines** using **n8n**, Python, and **Composio MCP**, connecting multi-service APIs, webhooks, and databases to reduce manual operational latency by **85%**.
- Engineered bespoke **Model Context Protocol (FastMCP)** servers with multi-account authentication and dynamic tool routing, enabling LLMs to securely execute live web browsing, crawling, and API transactions.
- Built and deployed high-performance Large Language Model (LLM) infrastructures (OpenClaw, NemoClaw) featuring dynamic multi-model fallbacks (Gemini 2.5/3, Claude, GPT-4, OpenNimVerge) for continuous 24/7 reliability.
- Created an autonomic **Programmatic SEO + GEO + AEO Engine** that automatically generates real-time comparison tables, schema markup (JSON-LD), and root /llms.txt manifests, driving organic AI search indexing.
- Configured and hardened hybrid production environments across Cloudflare Workers, Vercel Edge, and Hostinger/Oracle Linux VPS with **Docker** and **Traefik**, enforcing rate-limiting and achieving **99.9% uptime**.
- Engineered scalable backend architectures utilizing **Supabase** (PostgreSQL with Row Level Security) and solved cross-border digital monetization natively by deploying **Razorpay** automated checkout flows.

Founding Publisher (Cohort 1) — Autonomous Job & Search Agent — Villow AI

August 2026 – Present | Remote

- Selected as a Founding Publisher for Villow's autonomous agent ecosystem, leading development of the flagship **Job Search, Resume Tailoring & Autonomous Auto-Apply Agent**.
- Designed an autonomous ATS Navigator utilizing headless browser automation and live ATS signal scoring, enabling dynamic JD-to-resume keyword matching and direct application staging.
- Constructed a deterministic prompt and validation pipeline that outputs ATS-compatible customized resumes and cover letters without hallucinating candidate qualifications.

FLAGSHIP PRODUCTION SYSTEMS & FEATURED ARCHITECTURES

InkTwin (inktwin.primuez.in) — Autonomous AI Handwriting & Document Study SaaS

Next.js · Supabase · Razorpay · Vision OCR

- Architected, built, and monetized an AI SaaS platform that converts digital academic text into natural, authentic human handwriting fonts and offers interactive homework/study assistance.
- Integrated dual vision/OCR pipelines with custom prompt grounding (Gemini 2.5/3 Flash Vision) and built full-stack authentication, storage, and database layers on Supabase.
- Implemented automated recurring Razorpay payment webhooks and resilient multi-model failover mechanisms ensuring 100% operational uptime.

PrimuezSure (primuezsure.primuez.in) — Autonomous B2B Insurance RAG Intelligence

FastAPI · RAG · Vector Search · PyPDF

- Engineered an autonomous RAG engine capable of ingesting complex, multi-page unstructured insurance policies and financial legal contracts.
- Developed semantic chunking and citation-backed extraction algorithms that pinpoint coverage gaps, fine-print exclusions, and claim risks for B2B advisors and consumers.
- Delivered an interactive, real-time audit generation interface with automated executive summary generation.

Universal Agent OS & DOGRAH (Voice Agent) — Decoupled Agent Workspace & Voice Engine

Next.js · Electron · WebGL · Python Daemon

- Engineered a decoupled, cross-platform workspace combining Next.js, Electron UI, and WebGL with a local Python background daemon, delivering unified agentic capabilities via persistent Obsidian memory.
- Built DOGRAH as an ultra-low-latency multimodal AI voice assistant integrating streaming speech-to-text (STT), high-speed LLM reasoning, and natural text-to-speech (TTS) synthesis.

Career-Ops & Primuez Guard — Autonomous ATS Application Engine & Cloud Sentry

Python · Crawl4AI · ReportLab · Linux Crons

- Built an intelligent dual-cron architecture that autonomously scrapes job portals via Crawl4AI, scores technical JD match confidence, compiles bespoke ATS PDF resumes via ReportLab, and synchronizes live tracking to Google Sheets.
- Created Primuez Guard, an autonomous watchdog agent actively monitoring server resource telemetry, Docker container health, SSL certificates, and security integrity across deployed VPS instances.

CERTIFICATIONS & VERIFIED CREDENTIALS

- **Triple Oracle AI Certified Professional:** Agentic AI, Fusion AI Agent Studio & OCI AI Foundations Associate (OCI AP-MUMBAI-1)
- **IBM SkillsBuild & Cohesity:** Data Analysis with Python (4079777), Cyber Resilience (ISG-DL08027G) & Prompting (4058858).
- **n8n Certified Professional & SimpliLearn:** Official badges across advanced multi-step n8n workflows, error triggers, and AI agent nodes.
- **Google & Kaggle:** 5-Day AI Agents Intensive Course with Google verified credential holder.

EDUCATION & LANGUAGE PROFICIENCY

Bachelor of Computer Applications (BCA)

Shri Shankaracharya Institute of Professional Studies (SSIPS) · In Progress

Secondary Education (Senior Secondary)

Krishna Public School (KPS), Dunda · Completed

Languages: English (C2 Proficient / Professional Executive), Hindi (Native), Sindhi (Bilingual)
